Age by Program

Rose Hill Center 2021 Resident Statistics

Length of Stay

Residential Rehabilitation

Recommended 9-12 Months

■ < 2 months ■ 2-6 months
 ■ 6-12 months ■ > 12 months

Transitional Living

Recommended 12 Months

■ < 2 years ■ 3-5 years
 ■ > 5 years

Length of stay varies based on a number of factors (e.g. Diagnosis, Co-Occurring conditions, resident goals and motivation, etc). In 2021, length of stay was impacted by COVID-19, resulting in many Residential participants leaving early and Transitional participants extending their stay. Every resident has an individualized treatment plan to meet them where they are and help them to reach their highest level of independence.

Rose Hill Graduates - Where Did They Go?

After Residential Rehabilitation

■ Semi Independent Living ■ Adult Foster Care
 ■ Independent ■ Family

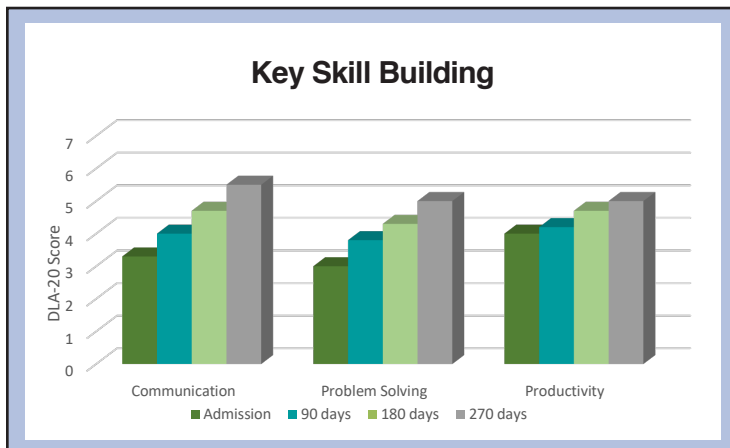

After Transitional Living

■ Independent ■ Adult Foster Care
 ■ Independent + CSP*

*Rose Hill Community Support Program

OUTCOME MEASURES.

Each year, the success of Rose Hill Centers' treatment program can be seen in the lives of the residents as they return to their families and communities. We have verified this through valid and reliable outcome measures which have consistently shown an improvement. Rose Hill utilizes the Daily Living Activities-20 (DLA-20) which measures twenty items of functionality. The Key Skill Building chart shows areas that families specifically asked about, and clearly illustrates that those who stay longer continue to improve. This is achieved through learning important skills, practicing those skills for an ample amount of time to gradually create **significant and lasting** change.
